Exposure group

Vitamins A, C, D, E, K | Minerals & Trace Elements | Fruits & Vegetables | Other

RR < 1 = negatively associated with aggressive prostate cancer risk. | ◆ pooled RR (size reflects number of studies) | ◇ red outline = statistically significant (95% CI excludes 1.0) | ◆ faded = not statistically significant | dashed line below CI = 95% prediction interval (where available)

Include subexposures: No

No published subtype baseline: HR ≈ RR ≈ OR approximation. Missing case totals are not estimated.
